

ALERT to Parents, Educators, School Boards:

**WiFi - wireless networks, game stations,
cell phones and cell towers can be harmful**

CHILDREN ARE MOST AT RISK

due to thinner skulls and more aqueous brains

Is your school or home wireless?

Are you aware of the scientific evidence linking wireless devices with harmful biological effects: leakage of the blood brain barrier,

- damage to the brain - breakage of the DNA

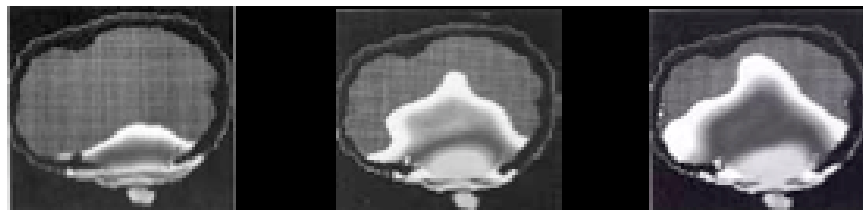

- learning difficulties - risk of cancer and neurological disease?

Are you concerned? Parents, educators, health experts and governments around the world are very concerned about this radiation exposure, and are taking action: against cell towers, removing wireless networks, and banning - or limiting the use of - cell phones, portable phones, and game stations.

Radiation from wireless devices penetrates the skull

Canada's "safe levels" may produce harmful effects

Adult

10 yr old

5 yr old
