money for old rope...

"Telecom companies are offering people thousands of pounds to hide mobile telephone masts in their homes"

(Daily Telegraph)

DO YOU WANT UP TO £7,000 PER YEAR FOR 10 OR 20 YEARS?

SiteShare Marketing is the UK's leading agent for introducing property owners to telecom companies. We work for the property owner, not the telecom companies, so we can negotiate the best deal for you.

The telecom companies are now looking to site new micro signal-boosters. These are so small they can fit into burglar alarm boxes, guttering or a chimney. *And the telecom companies pay up to £7,000 rent per year to homeowners.*

• But How Can You Reach the Telecom Companies?

Registering with SiteShare Marketing makes this easy because we:

1. Let the telecom companies and their many agents know that your home could be available.
2. Register your home's details on our website that lists potential hosts – so that if a company is looking for homeowners in your area, they find yours.
3. Negotiate with the telecom company on your behalf – making sure you get the maximum rent and the best terms.
4. Make sure you are completely happy before anything goes ahead – you have the final say on any agreement.

• What Does This Cost?

Our fees are payable only if a rental agreement is secured. If an agreement is signed, you pay our fee of just 25% of the first year's rent we have negotiated for you. The remaining 75% of the first year and all the rent for the remaining years (between 9 and 19 years), is all yours.

Our fee only becomes payable after you have received the first payment from the telecom company.

• How Do I Register?

Simply complete the attached slip and return it in the return envelope enclosed [with a cheque for the subscription charge of £19.99]. If you have any questions, then visit our web site or email us at info@sitesharemarketing.com.

Once we have received your slip, we will let the telecom companies know of your interest. We will also activate your unique user name and password to our website. You will then be able to monitor the interest being shown in your home by the telecom companies. You can also access the government reports and identify any other masts in your area. And if you have any queries, our online team will be able to answer your questions.

Remember – Rents of Up To £7,000 every year for up to 20 Years are Available
